As a member of the Center for Science in the Public Interest (CSPI), I urge you to save human lives by banning the use of medically useful antibiotics in animal feed. Adding antibiotics to feed in order to promote growth can make bacteria resistant to those antibiotics. And that can leave physicians with no way to treat life-threatening bacterial infections in humans. That's why I support the petition filed by CSPI.

*The contents of NAH are not intended to provide personal medical advice, which should be obtained from a qualified health professional.*

■ *The use of information from Nutrition Action Healthletter for commercial purposes is prohibited without written permission from CSPI.*
